

ATTORNEY DOCKET NO. 2754 CON

SERIAL NO. 09/912,206
CLEAN VERSION OF CLAIMS

11. (Once amended) A wall mountable outdoor light fixture assembly comprising:

a first support section located on said light fixture, said support including a planar section having at least one upper aperture and two opposingly located lower apertures;

(b) a second support adapted to be secured to a vertical support surface and adapted to engage said first support, said second support including a planar section having at least one upper projection and at least two opposingly located and linearly spaced apart lower projections, said lower projections positioned to align with said apertures on said first support;

whereby said lower projections are first insertable through said lower apertures to permit said light fixture to rest upon said lower projections and to be rotated upwardly so that said upper projection is inserted through said upper aperture to secure said light fixture to said support surface and to cause said planar sections to abut.
